

The Allen Institute's Postbaccalaureate (Postbac) Program is designed to provide mentorship and research experience for those who have completed an undergraduate degree and demonstrated a commitment to STEM, allowing them to pursue advanced STEM education or start a career in science or a related field.

Each Postbac will own a project that seeks to address a specific research question or scientific problem, and they will be paired with a primary mentor who will assist the Postbac in their career development and help bring them into the Allen Institute community. Postbac roles will start in June and are term-limited to one year, with the option to extend to two years. Potential Postbacs are not required to have prior research experience in order to apply.

Allen Institute will post the 2023 Postbaccalaureate Research Assistant roles on or before December 24th, 2022.

- The last day applications will be accepted is January 17th, 2023
- Allen Institute offers two start dates to accommodate both semester and quarter schools. For 2023 those dates will be June 5th, 2023, and June 20th, 2023, and the program will run for 1-2 years
- Postbacs are expected to work 40 hours a week throughout the entire period

2023 Postbac research areas include:

- Modeling epilepsy in mice and testing the effects of therapeutic transgenes
- Genetic manipulation of stem cells to create and establish cell lines for distribution
- Analyzing T cell changes to illuminate the effects of age on functional immune responses
- Analyzing racial and ethnic differences for patients with rheumatoid arthritis
- Studying the effects of psilocybin (psychedelic) on cortico-thalamus interactions
- Whole-brain imaging to elucidate neuronal projections that link connectivity and behavior

Eligibility

- Completed a bachelor's degree (or will have completed by the start of the program) and does not have an advanced degree in the role's relevant STEM field
- Must be able to start on either June 5th or June 20th, 2023, and commit to the full one-year program
- Must be eligible to work in the U.S. for the program duration
- Must be 18 years of age or older

Postbac Activities

In addition to working with scientists across the Institute, Postbacs will have the opportunity to participate in fun activities and workshops, attend scientific lectures, and present their work at the end of the postbac program period.

Compensation

Postbacs will receive \$27.17 per hour, plus benefits.

Benefits

Postbacs will receive the same benefits as full Allen Institute employees. Highlights include:

- Employer-paid healthcare plan options
- Ample time-off, including paid winter break
- Fitness and wellness membership reimbursement
- Subsidized transportation/commute options
- Student loan support and learning and development resources

Housing and Travel

All Postbacs are expected to work onsite at our Seattle, WA, location throughout the program. The Allen Institute offers housing and travel support for Postbacs who need assistance with the cost of travel to Washington State.

For qualifying Postbacs, we offer the following options:

- 1) Fully covered air travel to get to WA state

And one of the following:

- 2) A relocation stipend* to be used toward housing and travel costs
- OR-
- 2) Third party relocation support for travel to WA state and housing costs

**this may be subject to standard tax withholdings.*

How to Apply

- Navigate to the Allen Institute Internships & Postbaccalaureate jobs page and search for roles with 'Postbaccalaureate Research Assistant' included in the job title. If a role does not include 'Postbaccalaureate Research Assistant' in the job title, it is not part of this program.
- Complete an application through the career portal.
- The application will ask you to submit a resume and a personal statement addressing the following topics in no more than 400 words: NOTE, this statement will apply for any applications you submit. It is one statement per candidate, not per application.
 - Tell us why you are interested in working at Allen Institute.
 - Provide a brief personal statement that describes your interest in the postbac program and how this opportunity will be meaningful to you and your career.
- We may reach out to request additional documentation such as:
 - College transcript and Courses taken (*we accept unofficial & official transcripts*).
 - Sample of coding work.
- The last day applications will be accepted is January 17th, 2023.

FAQ's

Can I apply to more than one Postbac position?

Yes, you can apply to multiple Postbac openings. You will need to fill out a separate application for each position, however you will only upload one personal statement and it will apply for any application you submit.

Will I receive confirmation that my application was received?

Our recruiting system (ClearCompany) will generate an automated response confirming receipt of your application. Check your spam or junk folders.

When will I be contacted for an interview?

The last day applications will be accepted is January 17th, 2023. Should you be selected for next steps, you will be contacted by a hiring manager or mentor for an interview. The estimated timeframe for interview requests will be from the date you applied through March 31st, 2023.

What is the interview process like?

You will be contacted by the mentor or a Talent Acquisition team member for an initial interview. You should expect to have phone or video interviews with the mentor and one or two other members of the hiring team.

Do you provide visa or immigration assistance?

At this time Postbacs must hold valid authorization to work in the U.S. for the program duration. The Allen Institute will not provide visa sponsorship for this program.

I will graduate from my educational program in May/June of 2023. Can I still apply for a postbac position?

Yes, 2023 graduates of a bachelor's program will be considered. You must have completed your bachelor's degree by the time the postbac program begins in June.

I have a master's degree. Can I still apply?

This program is intended to target those for whom research experience will greatly benefit their STEM careers. If your master's degree is in a STEM field relevant to the work that the role will entail, you are still welcome to apply, but you might be better suited for one of our permanent roles.

When will I need to decide if I would like to extend to a second year?

We will be in discussion with our Postbacs and mentors throughout the program to ensure that we are always informed about their goals and plans. For Postbacs choosing to apply to graduate or medical school in their first year, we will wait until after admission decisions have been received before approving an extension. Postbacs will not be able to extend beyond two years, but will be welcome to apply to any open Allen Institute positions once their program has finished.

Additional Inquiries

Due to the large number of applicants and inquiries, we will be unable to respond to individual inquiries about the status of your application. The Allen Institute main phone number will not be routed to the Talent Acquisition team. Should you be selected for an interview, a team member will reach out to you directly using the contact details you submit in your application.
